DITCO Information Technology & Telecommunications Acquisition Package Submission & Ordering Guide

Getting Started

Customers start the requirements definition process by conducting market research (reference [FAR Part10](#) and [DFARS Part 210](#)) to determine what's available in the commercial market place, can small businesses perform the effort, etc., If your market research confirms the use of existing [IDIQ](#) contracts and [BPAs](#) can be used to fulfill your requirement, DISA/DITCO has a number of Multiple-award IT and Telecommunication [established contracts](#) available for your use.

If one of these pre-established contract vehicles can be used to satisfy your requirement, the web site for each suite of contracts includes task order guidelines (TOG) that provide easy, step-by-step instructions, submission instructions and sample documents to assist you in preparing a purchase request package for submission to DITCO. Where contract specific TOGs do not exist, use the Requirements Ordering Instructions and sample documents on this page to prepare and submit your purchase request package.

If none of the existing contract vehicles will work for you, then you will need to prepare your IT or telecommunications requirements package in accordance with the following "Requirements Ordering Instructions".

If you are submitting an option exercise package, follow the instructions at [Enclosure 25](#).
